SEQUENCER 808-16

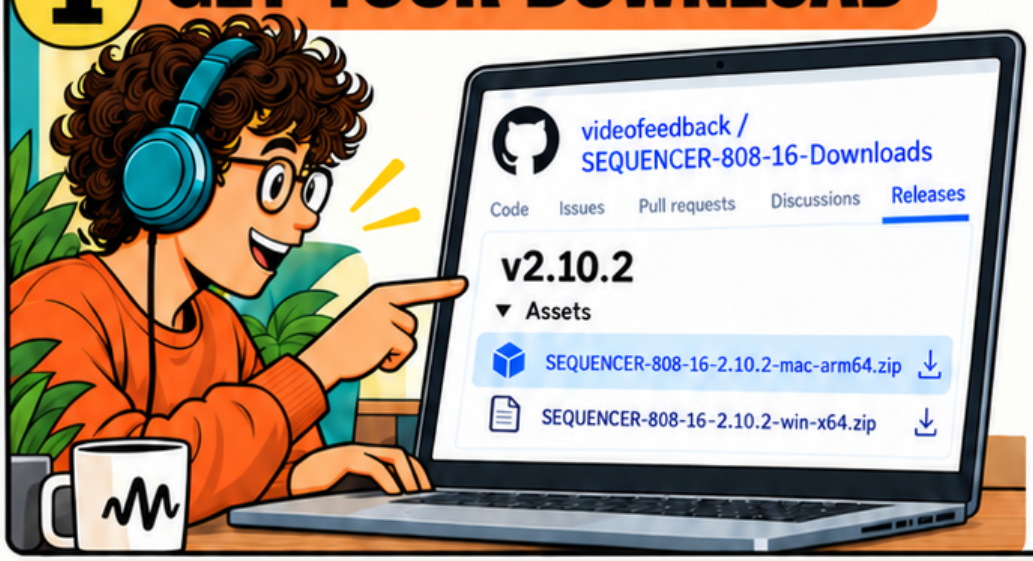

FROM GITHUB TO YOUR FIRST BEAT

ONE GUIDE • MAC + PC • v2.10.2

First: install VCV Rack 2.6.6 for your computer. Launch it once, then quit.

1 GET YOUR DOWNLOAD

On GitHub, open videofeedback/SEQUENCER-808-16-Downloads → Releases → v2.10.2.

MAC • Apple Silicon
`SEQUENCER-808-16-2.10.2-mac-arm64.zip`

PC • Windows x64
`SEQUENCER-808-16-2.10.2-win-x64.zip`

Choose the complete ZIP, not 'Source code'.

2 UNPACK IT

MAC Double-click the ZIP.

PC Right-click the ZIP → Extract All...

3 DOUBLE-CLICK TO INSTALL

With Rack closed, double-click your installer:

MAC INSTALL-MACOS.command

PC INSTALL-WINDOWS.cmd

A terminal window opens and copies the plugin and shared content.

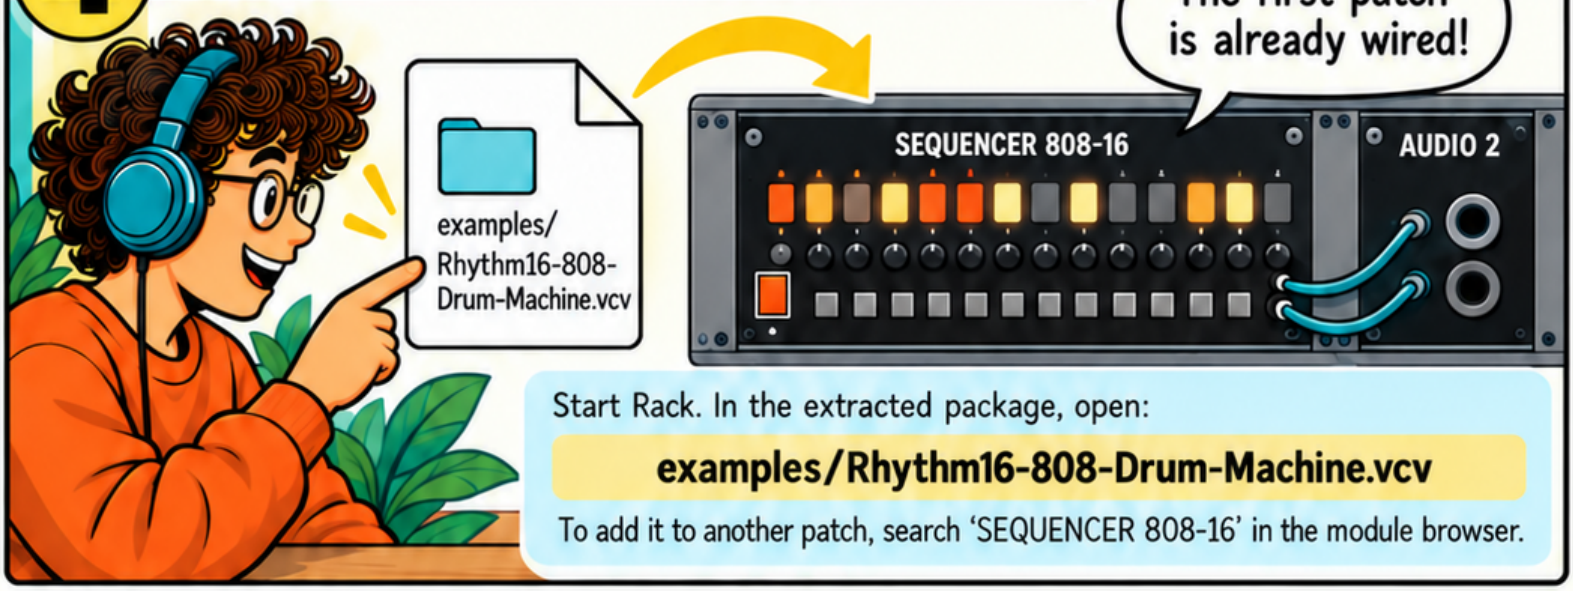

On Windows, press any key when finished.

Blocked? Follow INSTALLATION.md in the package.

MAKE YOUR FIRST BEAT

SEQUENCER 808-16 • MAC + PC

4 OPEN THE READY-WIRED PATCH

Start Rack. In the extracted package, open:

examples/Rhythm16-808-Drum-Machine.vcv

To add it to another patch, search 'SEQUENCER 808-16' in the module browser.

5 CHOOSE YOUR AUDIO

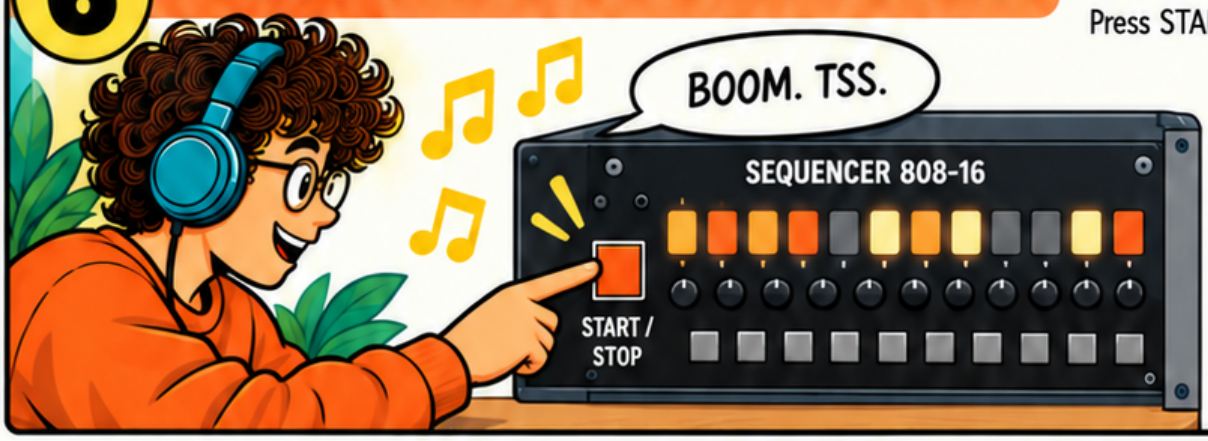

In Audio 2, choose your driver and output device.

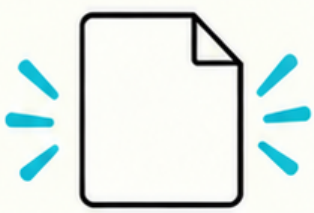

MAC	Core Audio
PC	Your Windows audio driver

Check output channels and start at a low volume.

6 PRESS PLAY. MAKE IT YOURS.

Press START / STOP on the sequencer.

Edit the beat, then save a new .vcv patch.

More examples and troubleshooting: **INSTALLATION.md**

TRY THE COMPLETE EXAMPLES

SEQUENCER 808-16 • MAC + PC • v2.10.2

7 ADD THE SUPPORTING MODULES

Install these for your platform via VCV Library or the vendors:

ALL FOUR EXAMPLES
